HOW TO READ THESE SHEETS

- Third-angle projection: side views sit beside the front view, the top view above it.
- White lines = visible edges. Dash-dot = center lines. Arrows = dimensions in centimeters.
- 1 game unit = 1 meter. Characters face +Z (toward you in the FRONT view).
- Yellow balloons number the parts; the same numbers appear in each parts list.
- Colors marked "runtime" change in the game (topic color, lane color, answer sign).

**PIP — WELLNESS ROBOT**

- Default hero. A friendly hover-robot with a glowing heart core and visor face.
- Pip floats 8 cm above the track; the hover joint bobs ± 2.5 cm at 1.6 Hz.
- Visor is an ellipsoid set 16 cm forward so it bulges 2 cm out of the head shell.
- Eyes, smile, ear rings, cuffs and antenna are emissive (unlit) and stay bright at night.
- Heart core pulses with the combo meter during a run.

MIA — SPORTY EXPLORER

- Playable hero. Loves dancing, water breaks and trying new foods.
- Chibi proportion: total height $\approx$ 2.9 heads; head 44 cm tall, eyes on the head's equator.
- Hair cap is a 96° sphere slice tilted 32° back so the face stays open.
- Ponytail hangs from its own joint and swings with a spring during runs.
- Blueprint pose: relaxed A-pose, shoulders rotated 16° out.

LEO — ENERGETIC SPRINTER

- Playable hero. Loves running, resting well and cheering for friends.
- Same skeleton as Mia scaled 104%. Shorts end above the knee; socks + sneakers below.
- 34 hair twists are placed on an ellipsoid with a fixed seed so every build matches.
- Hood is a 180° torus roll plus a soft back panel resting behind the neck.
- Blueprint pose: relaxed A-pose, shoulders rotated 16° out.

GINGER — FOX COMPANION

- Playable hero and companion. A cheerful fox with a mint-green scarf.
- Quadruped rig: front and back leg pairs gallop 180° out of phase; body pitches $\pm 4^\circ$.
- Tail is a three-joint chain that wags and trails behind with spring lag.
- Ears rest 14° outward and twitch on correct answers.
- Big cartoon eyes: white, green iris, pupil, highlight — four stacked ellipsoids.

POWER GATE — ANSWER OBSTACLE

- One per lane. Carries an answer sign; splits open for a helpful answer, wobbles and crashes softly for a miss.
- Three gates sit on lane centers 240 cm apart; each gate is 226 cm wide, leaving a 14 cm gap.
- The answer sign is one 1024x512 canvas texture split across both panels (left half / right half).
- Helpful answer: panels slide ± 1.2 m apart and spin away; the core bursts into sparkles.
- Miss: panels crack, wobble $\pm 6^\circ$ and drop; the runner keeps going (gentle crash-through).
- Frame and panel color follow the obstacle's wellness topic; lane badge color follows the lane.

12	Gate core	x1	R15

BEHAVIOR

- Gates spawn 64 m ahead, fly in and park 24 m ahead while the question is read and during the 7-second thinking time.
- During the answer window (30 → 22 s by tier) the gates glide from 24 m to the runner. DASH NOW closes the gap in 0.6 s.
- Selected lane: gate core pulses, lane light brightens, the matching answer card glows. Colors never hint which answer is right.
- Helpful answer → panels split open with sparkles in the topic color. Miss → soft wobble, cracked panels sink; the run continues.
- The sign texture is drawn once per encounter on a canvas (Baloo 2, auto-fit). Text is also shown on large HTML answer cards.
